Hello Cynthia,

We are preparing for our mobilization to the Dimock Residential Groundwater Site. We anticipate on starting our sample collection effort on Monday 1/23/12, and you should start to receive samples on Tuesday 1/24/12. So we can better prepare for the sample collection, packaging, and shipment process can you please verify that the analytical information in the attached tables are correct. The last I was aware there were several parameters that had not been assigned to a lab. These are currently in our tables under the TBD (to be determined) row. Also, I wanted to double check to see if any of the other parameters had been re-assigned to other labs.

Thanks,

Suddha Graves
